

Systems View of the Office Document World

The real and holistic 'cost' of producing a physical page within the office document environment is between 52¢ and 70¢. It is made up of more than one thousand cost-chains and connected activities. The EDAM[®] system map shows the perfect state of these interconnected pieces working together, embracing technologies, resources, people and processes.

Maximizing positive chain reactions between all of the parts will clearly reduce cost and resources, save time and get more business done.
